CSS MySQL
JavaScript Wordpress
MongoDB

## PROJECTS

**Min Max Quantities**
WordPress Plugin
Maintained a WooCommerce plugin with 10,000+ active installations using PHP, WordPress, WooCommerce, JavaScript, MySQL, HTML & CSS. Handled bug fixing, compatibility updates, performance improvements, client support, and customizations based on client requirements.

**Serial Numbers**
Woocommerce plugin
I have worked extensively with the WC Serial Numbers plugin, where I handled bug fixing, customizations, and client-specific feature enhancements. I am also continuing to maintain the plugin, troubleshoot issues, and provide tailored support based on client requirements, using PHP, WordPress, WooCommerce, REST API, MySQL, and Git.

**Hotel Booking Project**
This is a Hotel searching and booking project with admin panel. This project has searching and booking facility with google maps pointing that hotel and hotel room that dynamically change with booking dates. The admin panel has a dashboard that shows income with charts. This project is based on custom PHP, Mysql , javascript, html and css(Bootstrap-5).

**WC Stock Status**
WooCommerce Plugin
A custom WooCommerce plugin for managing and displaying product stock status directly on the shop page. It enhances user experience by dynamically showing stock availability, helping customers make quicker purchase decisions. Built using PHP, WordPress, and WooCommerce hooks.

**WC Review for Discount**
WooCommerce Plugin
Developed a custom WooCommerce plugin that encourages customer engagement by offering discounts for product reviews. Built using HTML, CSS, PHP, JavaScript, and WooCommerce hooks, featuring seamless integration, automated discount generation, and a user-friendly workflow for both customers and admins.

**Fern Vally Famrs**
E-commerce website is a dynamic online platform powered by a robust tech stack including PHP, HTML, and CSS.The integration of PHP allows for powerful backend functionality, inventory management, and dynamic content generation.
Technology : Html , Css, Php, Wordpress

**Project-Management-App**
Technology: Laravel 11 , React , html, tailwind
This app allows users to store projects and tasks with due dates, while ensuring secure login authentication. Admins have the ability to edit and delete tasks, and a dashboard provides an overview of pending tasks.

**Member Directory**
This project is a Laravel 10-based member directory application that features an admin panel and leverages the Breeze authentication starter kit, the Socialite package for social authentication, and pagination for effective data management. Built on the robust and flexible Laravel framework, the application aims to provide a comprehensive directory of members with user-friendly navigation, secure authentication, and efficient administration capabilities.

**H - Paulson Website**
This is a German website that has been designed in accordance with the provided PSD file. This website is built using HTML, CSS (Bootstrap 5), JavaScript, and WordPress.

**Student Management System**
This project is built on Laravel 10 and encompasses functionalities related to students, teachers, student courses, batches, enrollments, and payments. It allows users to download payment details in PDF format. Additionally, it includes HTML, CSS, and Bootstrap for enhanced presentation and user interface.

**Ndc Form**
This is a wrodpress plugin that has been created with PHP, Javascript, html ,css. This plugin has the functionality to submit form with personal data and download the data from admin dashboard. This wordpress plugin also has image functionality with crop and upload.

**Shopping Cart**
An Ecommerce Website with admin panel to add,edit and delete products with category and user panel to order product with cart and payment method.
Technologies: Raw php, Html , Css, Mysql.

**Digital Cart**
A website with online shopping facility(cart, add, remove,
payment) with admin panel.

Technologies: html, css, react js ,mongoDB.

**Alumni Association Website**
A website that has the facility to create job post with dates and also visible for viewers.

Technology: html, css,javascript, reactjs, MongDB.

## PROGRAMMING COMPETITION

**Online Judge IDs**
Codeforces : tonoyict
Leet Code: tonoyict
UVa : tonoy
Hackerearth: tonoyict20

## EXTRACURRICULAR ACTIVITIES

RUET TECHNOCRACY 2019 Coding Contest

(Team: mbstu_bijoyangon) ,
Training Juniors C, C++, Algorithms and Data Structure.
